Career Objective

Passionate and detail-oriented Full-Stack Web Developer dedicated to engineering high-performance, responsive, and user-centric web applications. Specializing in modern JavaScript/TypeScript frameworks and robust backend architectures with Next.js, Node.js, PostgreSQL, and MongoDB. Proven track record in writing clean, maintainable code, integrating secure authentication, and optimizing relational/NoSQL databases. Eager to contribute to innovative projects, collaborate within dynamic engineering teams, and deliver scalable, high-impact software solutions.

Skills and Technologies

Programming Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend Development: React.js, Next.js, Redux / State Management, React Router, Vite

Backend & APIs: Node.js, Express.js, RESTful APIs, JWT Authentication, NextAuth / Firebase

Tools & Platforms: Git, GitHub, Postman, Beekeeper Studio, Docker, Vercel, Netlify, Surge, npm, Figma

Soft Skills: Problem-Solving, Team Collaboration, Time Management, Technical Communication

Projects

LuxePlan – Event & Decor Management System (December 2025 - December 2025)

[Live](#) | [Client](#) | [Server](#)

A premium full-stack MERN application designed for managing luxury event decoration services, offering a seamless booking experience with secure payments and role-based dashboards.

Key Features:

- **Booking & Payments:** Real-time booking with slot checks and secure Stripe payment integration.
- **Role-Based Dashboards:** Admin, Decorator, and User dashboards with JWT-protected access control.
- **Data Management & Analytics:** Service, user, and booking management with analytics charts.

Technologies: React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Firebase Authentication, JWT, Stripe

TaskVerse – Freelance Marketplace (November 2025 - November 2025)

[Live](#) | [Client](#) | [Server](#)

A dynamic full-stack platform that allows users to post, manage, and accept freelance tasks. Designed to streamline collaboration and task management with secure authentication and a responsive interface.

Key Features:

- **Security & Routing:** Google/Email authentication with protected routes for secure access.
- **Task Management:** Full CRUD job management with responsive UI and dark/light mode.
- **Interactive UX:** Enhanced experience with toast notifications and smooth interactions for task actions.

Technologies: React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Firebase Admin

GameHood – Game Library Web App (October 2025 - October 2025)

[Live](#) | [Client](#)

A game exploration platform for discovering and viewing indie games in a clean, engaging layout. Built with React to enable component-based architecture, client-side routing, and efficient UI state management.

Key Features:

- **User Authentication & Security:** Google/Email login with protected routes for authorized access.
- **Search & Sorting:** Search games and sort by popularity, ratings, or downloads.
- **Enhanced User Experience:** Smooth interactions using Framer Motion and Swiper sliders.

Technologies: React.js, Tailwind CSS, Firebase Authentication, Framer Motion, Swiper

Certificate

Complete Web Development With Programming Hero (July 2025 - January 2026)
